I warned you all last newsletter that I would have to start with a small project I'm working on if nobody sends me anything....guess what...nobody sent me anything. So here is my contribution: It's a 17 in. wingspan Eindecker rubber powered kit. It's a laser cut kit made by Dumas. It's a perfect fit for all the guts from a Hobbyzone Aeronca champ, which I bought especially for this project. Here's a pic of the fuselage side and rudder. Just to give it some scale feel it's sitting next to the rudder from the GP Cap 232 40 size I'm almost done with. I hope I get through the EIII without much trouble even though I have fat finger syndrome. I have had to resort to using tweezers and it's quite fun...

SEND ME SOME OF YOUR STUFF OR I'LL STRIKE AGAIN NEXT MONTH!!!!

Please be kind to your local hobby shops. They are in business for you and would appreciate your business. It's also just so much fun to spend some coin on some new toys.
